PROFESSIONAL SUMMARY

Results-driven **Flutter Developer with 3+ years** of hands-on experience architecting and shipping **cross-platform mobile applications** to the Play Store and App Store. Proven track record delivering apps with **10,000+ downloads**, integrating real-time IoT communication (MQTT), AI/LLM APIs, live streaming, and scalable Firebase & REST backends. Expert in **Clean Architecture, MVVM**, and state management with **GetX, Provider & BLoC**. Passionate about pixel-perfect UI, performance optimisation, and writing maintainable Dart code following KISS/DRY principles.

PROFESSIONAL EXPERIENCE

Flutter Developer

Shakuniya Solutions Private Limited, Chennai

Feb 2026 – Jun 2026

Full-time, On-site

- Developed **Flusso**, a feature-rich **live streaming & social messaging app** (Android) supporting audio/video live streams, real-time chat, media uploads, in-app games, and **PK battles**
- Architected the app with **MVVM + GetX** for reactive state management and consumed real-time **REST APIs** for streaming, payments, and messaging
- Designed the full **UI for a multi-role school management platform** (admin, teacher, accountant, librarian, parent, student) across **both web and Android** with **MVVM + GetX**; website live in production, mobile app pending release

Flutter App Developer

Onwords Smart Solutions, Coimbatore

Jan 2023 – Dec 2025

Full-time, On-site

- Led end-to-end development of **4 production Flutter apps** — from architecture to Play Store & App Store deployment — with a combined **10,500+ downloads**
- Individually architected and shipped **Onwords Workspace** (Android + iOS) from scratch; built **Mudhal AI** with the OpenAI ChatGPT API, published on the App Store
- Implemented **MQTT-based real-time communication** for live IoT device control, plus **Siri (HomeKit) & Alexa** voice assistant integration
- Applied **Clean Architecture & MVVM** with **Provider, get_it & hive**; integrated the full **Firebase suite** in cross-functional Agile teams via **Jira & Git**

PROJECTS

Flusso – Live Streaming & Social Messaging App

Stack: Flutter, Dart, GetX, MVVM, REST APIs, LiveKit SDK, Real-time Chat

- Built a **real-time live streaming platform** with audio/video broadcasting, live chat, media uploads, and interactive in-app games
- Implemented **PK battle** feature enabling competitive live face-offs between streamers, with real-time scoring
- Used **MVVM + GetX** for reactive state management and integrated multiple **REST APIs** for streaming, messaging, and payments

School Management Platform – Web & Mobile UI

Stack: Flutter (Web & Android), Dart, GetX, MVVM, REST APIs, Responsive UI

- Designed and built the complete **UI for a multi-role school management system** with dedicated dashboards for admin, teacher, accountant, librarian, parent and student accounts
- Delivered **responsive layouts for both web and Android** from a shared Flutter codebase, ensuring consistent UX across screen sizes
- Architected with **MVVM + GetX** and integrated **REST APIs**; the website is live in production with the mobile app pending release

Onwords Smart Things – Smart Home Automation App

Stack: Flutter, Dart, MQTT, Firebase (Firestore, Crashlytics, FCM, Auth), Provider, get_it, hive, REST APIs, Siri (HomeKit), Alexa

- Architected real-time smart home control using **MQTT protocol** for instant, low-latency appliance management across iOS & Android
- Built **scene automation engine** with scheduling by time, sunrise/sunset triggers, and conditional device-state rules

- Implemented **guest access sharing** with granular permissions, plus **Siri (HomeKit) & Alexa** voice control integration
- Achieved **10,000+ downloads** — the highest-performing app in the organisation's portfolio

Onwords Workspace – Enterprise Office Management App

Stack: Flutter, Dart, Firebase (Firestore, Auth, FCM, Crashlytics), Provider, get_it, hive, REST APIs, MVVM

- Sole owner of architecture, development & deployment of a **multi-module enterprise app** covering attendance, leave, task tracking, finance reporting, and lead management
- Implemented **real-time data sync** via Firebase Firestore and **role-based access control** for employees, managers, and admins
- Delivered Android to **Play Store** and iOS via **TestFlight** — managing the complete submission pipeline independently

Mudhal AI – AI-Powered Productivity Assistant

Stack: Flutter, Dart, OpenAI ChatGPT API, Text-to-Speech, Speech-to-Text, Firebase, Provider, get_it, hive, REST APIs

- Integrated **OpenAI ChatGPT API** for intelligent text generation and **AI image generation** with downloadable output
- Implemented **bidirectional voice features**: voice-to-text input and text-to-speech playback with downloadable audio
- Designed **conversational chat-style UI** and navigated full **App Store review compliance** for a successful iOS launch

Onwords ST – Tablet-First Smart Home Control Panel

Stack: Flutter, Dart, MQTT, Firebase, Provider, get_it, hive, Adaptive Layouts, REST APIs

- Developed a **tablet-first Flutter app** for wall-mounted smart home control panels, digitally replacing physical switch panels
- Engineered fully **adaptive large-screen layouts** — grid controls, zoning panels, and multi-device dashboards utilising the full tablet viewport
- Implemented **MQTT real-time control** optimised for **always-on, continuous usage** as a persistent wall-panel; 500+ downloads across Play Store & App Store

TECHNICAL SKILLS

Languages: Dart, Kotlin (Basic)

Framework: Flutter (Android, iOS & Web)

State Management: GetX, Provider, BLoC (Basic)

Architecture: Clean Architecture, MVVM

Backend & BaaS: Firebase (Realtime DB, Firestore, Cloud Storage, Crashlytics, FCM, App Distribution, Authentication); REST APIs

Real-time: MQTT (IoT communication), LiveKit SDK, Real-time Chat

Mobile Features: Push Notifications, Google Maps API, Home screen widgets

Dev Tools: Android Studio, VS Code, Xcode, Jira, GitHub

Platforms: Google Play Store, Apple App Store, TestFlight, Firebase App Distribution

EDUCATION

Master of Business Administration (MBA)

Sri Krishna College of Engineering & Technology, Coimbatore

2019 – 2021

CGPA: 7.8 / 10.0
