PROFESSIONAL SUMMARY

Flutter Developer with 3+ years of experience building and deploying production Android and iOS applications. Hands-on experience with Flutter, Dart, Firebase, REST APIs, Clean Architecture, MVVM, Provider and GetX, with additional experience in IoT/MQTT, AI integrations and offline-first applications.

TECHNICAL SKILLS

Languages	Dart, Kotlin
Flutter & State Management	Flutter, Provider, GetX, ChangeNotifier
Architecture	Clean Architecture, MVVM, Repository Pattern, Use Cases, Dependency Injection
Backend & APIs	Firebase, REST APIs, HTTP, JSON, Authentication
Firebase	Firestore, Realtime Database, Storage, Cloud Messaging, Crashlytics, Remote Config, App Check, Play Integrity, App Distribution
Data & Storage	SQLite, Hive, Shared Preferences
IoT & Real-Time	MQTT, Publish/Subscribe Communication
AI & Voice	OpenAI APIs, Speech-to-Text, Text-to-Speech, AI Image Generation
Mobile	Android, iOS, Permissions, Push & Local Notifications, Scheduled Notifications, Maps, Location, File/Image Handling, Method Channels
Tools & Release	Git, GitHub, Android Studio, Xcode, Gradle, Play Console, App Store Connect, TestFlight, Jira, VS Code

PROFESSIONAL EXPERIENCE

Shakuniya Solutions Private Limited – Flutter Developer

Feb 2026 – Jun 2026 | Chennai, Tamil Nadu

- Developed and maintained Flutter applications using Dart, GetX and MVVM, working with backend and web teams on API-driven features.
- Contributed UI improvements, corrections and production fixes to Flusso, a live streaming application using LiveKit.
- Developed the UI for a School Management Web Application from scratch, based on functional requirements and reference research without an existing UI design.
- Worked with REST APIs, Firebase services, Google Maps, geolocation and geocoding integrations; prepared Android builds for testing and production releases.

Onwords Automation Private Limited – App Developer

Jan 2023 – Dec 2025 | Coimbatore, Tamil Nadu

- Developed and maintained multiple production applications across smart-home automation, enterprise management and AI as part of a Flutter development team.
- Developed Onwords Smart Things using MQTT to control gates, curtains, ACs, TVs, projectors and other connected devices; reached 10K+ Android downloads.
- Developed Onwords Workspace, an enterprise application covering attendance, location tracking, sales and marketing, R&D, leave management and daily work tracking.
- Developed Mudhal AI with OpenAI APIs for AI chat, image generation, speech-to-text and text-to-speech capabilities.
- Developed Onwords ST, a responsive tablet/control-panel application released on both Android and iOS; contributed to Clean Architecture migration, production debugging and releases.

SELECTED PROJECTS

Onwords Smart Things — Onwords Automation Private Limited

Flutter • Dart • MQTT • Firebase • Provider • Clean Architecture

- Migrated device communication from HTTP to MQTT, implementing publish/subscribe-based communication.
- Developed scheduled and multi-device automation workflows, including sunrise/sunset scenes.
- Integrated Firebase Authentication, Firestore, Realtime Database, Storage, FCM, Remote Config and Crashlytics.
- Worked on Android/iOS permissions, connectivity issues and production debugging; 10K+ Android downloads.

Onwords Workspace — Onwords Automation Private Limited

Flutter • Dart • Firebase • REST APIs • Realtime Database • Provider

- Developed modules covering employee attendance, location tracking, sales/marketing, R&D, leave management and daily work tracking.
- Built features from UI implementation through Firebase and REST API integration.
- Designed Firebase Realtime Database structures and implemented role-based access across business roles.
- Developed location-based attendance, sales workflows, voice notes, document uploads and invoice generation; contributed to Clean Architecture migration and production releases.

AquaCare CRM — Independent Client Project

Flutter • Dart • GetX • Clean Architecture • Firebase • SQLite

- Built the application from scratch, including architecture, UI development, backend integration, and Play Store deployment.
- Designed Firestore architecture and implemented Google Sign-In authentication.
- Built an offline-first SQLite workflow with queued synchronization to Firestore.
- Implemented customer, installation, service-request, employee/user and audit workflows with role-based access.
- Added customer search, filtering, sorting, pagination and contact export with duplicate checking; optimized Firestore usage and data loading for 12K+ records.
- Implemented Remote Config version enforcement, Firebase App Check and Play Integrity.

ADDITIONAL PROJECTS

Onwords ST — Onwords Automation Private Limited

Smart-home tablet/control-panel application | Flutter • MQTT • Firebase | Android & iOS | 1K+ Android downloads

Mudhal AI — Onwords Automation Private Limited

AI-powered chat, image generation and voice application | Flutter • OpenAI APIs • Firebase • Provider | iOS

Flusso — Shakuniya Solutions Private Limited

Live streaming application | Flutter • GetX • MVVM • LiveKit | Android

School Management Web Application — Shakuniya Solutions Private Limited

Developed the complete UI from scratch based on functional requirements and reference research, without an existing UI design.

Ninaivu — Personal Project

Offline-first insurance renewal application | Flutter • GetX • Clean Architecture • SQLite • Firebase | Android. Built and deployed to Google Play; currently enhancing and maintaining the application independently.

EDUCATION

Master of Business Administration (MBA) — Sri Krishna College of Engineering & Technology, Anna University
2019–2021 | CGPA: 7.76

B.Sc. Catering Science & Hotel Management — VLB Janakiammal College of Arts & Science, Bharathiar University
2015–2018 | CGPA: 7.22
