Professional Summary

Flutter Developer with 3 years of experience building scalable apps with clean architecture and strong real-time performance. Passionate about building resilient, maintainable software and known for applying KISS/DRY principles, optimizing performance, and delivering high-quality features quickly. Specialized in cross-platform app development, performance tuning, real-time communication, backend integration, and enterprise-grade UI/UX.

Professional Experience

Flutter App Developer

Onwords Automation Private Limited

(Jan 2023 - Dec 2025)

- Developed high-performance Flutter applications with clean architecture and optimized UI/UX
- Built an office management system with attendance, task, and finance modules, ensuring stable cross-platform builds
- Designed and developed a smart home automation app with real-time device control and automation scheduling
- Implemented MQTT-based real-time communication across mobile platforms
- Created an AI-powered assistant integrating ChatGPT, voice-to-text, and image-processing features
- Built and deployed a tablet-specific Flutter app optimized for enterprise workflows and large-screen usability
- Integrated Firebase, Crashlytics, real-time updates, and push notifications for seamless engagement
- Collaborated with designers, backend developers, and QA teams to deliver high-quality releases

Technical Skills

- Languages: Dart, Kotlin (Basic)
- Framework: Flutter
- State Management: Provider, BLoC (Basic)
- Architecture: Clean, MVVM
- Tools: Android Studio, VS Code, Xcode, GitHub, Jira
- Version control: Git
- Backend: Firebase (Realtime DB, Firestore, Cloud storage, Crashlytics, Messaging, App distribution, Authentication)
- API Integration: REST APIs
- Mobile Features: Notifications, Google Maps API
- Advanced: MQTT protocol, Tablet app support, ChatGPT

Projects

Onwords Smart Things – Smart Home Automation App

- Built real-time smart home automation features using MQTT for instant device communication
- Developed custom widgets for gate and device control
- Added real-time notifications for device and automation status
- Integrated Firebase Crashlytics for production stability

Onwords Workspace – Enterprise Office Management App

- Developed modules for attendance, task tracking, finance reporting, and lead management
- Implemented workflows for refreshment requests and product creation/update/deletion
- Improved backend workflows enabling seamless data sync for attendance, tasks, finance, and leads

Mudhal AI – AI-Powered Assistant App

- Built an AI assistant integrating ChatGPT, voice-to-text, and image-processing features
- Designed conversational UI for natural interaction
- Published exclusively for iOS and optimized for App Store compliance

Onwords ST – Tablet-Specific Automation App

- Developed a tablet-first smart automation app for large-screen enterprise workflows
- Designed adaptive large-screen UI layouts for improved tablet usability
- Deployed on both Play Store and App Store with optimized performance

Education

MBA, Coimbatore (2019 – 2021)

Sri Krishna College of Engineering & Technology

CGPA: 7.8
